Sequence 930, Application US/09263959

Patent No. US20020120160831A1

GENERAL INFORMATION:

APPLICANT: Rower, Lee

APPLICANT: Rower, Lee

TITE OF INVENTION: DIAGNOSTIC AND THERAPEUTIC COMPOSITIONS AND METHODS WHICH INVENTS Sequences: 1279

CORRESPONDENCE ADDRESS:

ADDRESSEE: Seed and Berry Lip

STREET: 6300 Columbia Center, 701 Fifth Avenue

CITY: Seattle
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Sequence 23, Application US/09766399

TITLE OF INVENTION: Nucleic Acid Treatment of Diseases or Conditions Related to
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             .;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Gaps
Sequence 2105, Application US/09864426A
| Sequence 2105, Application No. US2004018489A1
| GENERAL INFORMATION:
| APPLICANT: Third Wave Technologies
| APPLICANT: Third Wave Technologies
| APPLICANT: Lyamichev, Victor
| APPLICANT: Lyamichev, Victor
| APPLICANT: Saiser, Michael
| TITLE OF INVENTION: Enzymes for the Detection of RNA Sequences
| FILE REFERENCE: FORS-04946
| CURRENT FILING NATE: 2001.05-24
| NUMBER OF SEQ ID NOS: 2640
| SEPTIME PATENTE AND APPLICATION SECOND SECO

GENERAL INFORMATION

APPLICANT: University of Delaware

APPLICANT: Howard B. Gamper

APPLICANT: Howard B. Gamper

APPLICANT: Howard B. Gamper

APPLICANT: Wichael C. Rice

APPLICANT: Michael C. Rice

APPLICANT: WINDSWIDN: Targeted Chromosomal Genomic Alterations in Plants

TITLE OF INVENTION: Targeted Chromosomal Genomic Alterations in Plants

TITLE OF INVENTION: Targeted Chromosomal Genomic Alterations in Plants

TITLE OF INVENTION: Using Modified Single Stranded Oligomucleotides

FILE REFERENCE: Napro/009 PCT

GENERAL INFORMATION:
TITLE OF INVENTION: Hepatitis C Virus Infection
TITLE OF INVENTION NUMBER: US/09/740,332
CURRENT FILING DATE: 2001-03-26
NUMBER OF SEQ ID NOS: 9704
SOFTWARE: Patentin version 3.0
SEQ ID NO 3111
LENGTH: 17
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  APPLICANT: Ribozyme Pharmaceuticals Inc.
TITLE OF INVENTION: Enzymatic Nucleic Acid Treatment of Diseases or Conditions Rela
TITLE OF INVENTION: Hepatitis C Virus Infection
Sequence 1630, Application US/09740332
Sequence 1630, Application US/09740332
Publication No. US20030125270A1

Sequence 315. Application US/09817879
Publication No. US20030171311A1
GENERAL INFORMATION:
APPLICATION: Bloozyme pharmaceuticals Inc.
TITLE OF INVENTION: Braymatic Nucleic Acid Treatment of Diseases or Conditions Religible OF INVENTION: Hepatitis C Virus Infection
TITLE OF INVENTION: Hepatitis C Virus Infection
FILE REFERENCE: MBH800-80.4
CURRENT FILING DAIR: 2001-03-26
NUMBER OF SEQ ID NOS: 9703
SOFTWARE: PatentIn version 3.0
SEQ ID NO.3316
LENGTH: 17
                                                                                                                                                                                                                                                                                                                                                                                             Sequence 3300, Application US/09817879
